# Certus 3D

Certus 3D — Industrial 3D Printers, Additive Manufacturing & Software Solutions Portal

## 1. Executive Summary & Overview

Certus 3D is a corporate and engineering website showcasing industrial-grade 3D printers, additive manufacturing machinery, photopolymer resins, and proprietary slicing software for precision engineering and prototyping.

### 2. PROBLEM & ARCHITECTURAL CHALLENGE

**The Problem:** Industrial manufacturing clients require extensive technical validation, material specifications, and sample evaluations before investing in heavy manufacturing equipment.

**The Challenge:** Presenting complex industrial equipment specs, high-resolution CAD visuals, and downloadable datasheets in a fast, elegant, professional layout.

### 3. THE ENGINEERING SOLUTION

A modern engineering showcase website featuring interactive printer specifications, material matrices, quote calculators, and support resource portals.

## 4. Key Functional Modules

**Industrial 3D Printer Showcase**
Detailed technical specifications, print volume dimensions, and laser specs.

**Materials & Resin Compatibility Matrix**
Technical datasheets for engineering, dental, and jewelry resins.

**Interactive Quote & Sample Request Engine**
Inquiries for custom prototyping and equipment pricing.

**Software Download & Driver Hub**
Slicing software downloads, user manuals, and technical release notes.

**Applications & Case Studies Gallery**
Industrial use cases in automotive, aerospace, and medical engineering.

**Global Contact & Distributor Network**
Direct contact channels for worldwide sales inquiries.

## 5. Technology Stack & Deployment Architecture
