Go Get Notary

GoGetNotary — On-Demand Mobile Notary Dispatch & Remote Online Notarization Platform

1. Executive Summary & Overview

GoGetNotary is an on-demand legal dispatch platform connecting title companies, real estate agents, legal firms, and individuals with certified mobile notaries public and Remote Online Notary (RON) specialists across regions.

2. PROBLEM & ARCHITECTURAL CHALLENGE

The Problem: Securing a licensed notary for time-sensitive real estate closings, legal affidavits, or loan signings often takes days of manual phone calls and scheduling friction.

The Challenge: Geographic matching of mobile notaries within specified driving radii, verifying notary commission credentials and insurance bonds, and handling dynamic pricing based on distance and document count.

3. THE ENGINEERING SOLUTION

An automated notary dispatch marketplace featuring geo-location notary matching, upfront pricing calculators, appointment management, and notary compliance verification.

4. Key Functional Modules

Client Service Request Form
Selection of document type (Real Estate, POA, Healthcare, Affidavits) and signing address.

Algorithmic Notary Dispatch
Automated matching based on proximity, credentials, and schedule availability.

Notary Vetting & Document Verification
State commission license tracking, background checks, and E&O insurance management.

Interactive Booking Calendar
Appointment confirmation, rescheduling, and status updates.

Billing & Invoice System

Notary Partner Dashboard
Job acceptance, route details, and earnings summaries.

Transparent mileage and document fees with online payment processing.

Admin Management Portal

Quality assurance, dispute management, and statewide notary coverage mapping.

5. Technology Stack & Deployment Architecture

Backend: Laravel (PHP) | Database: MySQL | Frontend: Blade, Bootstrap, Google Maps Geocoding API | Payments: Stripe Integration
