HEALTHCARE & TELEHEALTH DIRECTORY

Kids Health Hub: Child Healthcare Provider Marketplace

Live Production Platform: https://kidshealthhub.com.au | Live map directory with subscription-based provider listings

1. Executive Summary & Overview

A map-first directory that helps Australian families find child health professionals: speech pathologists, occupational therapists, psychologists, and support workers. Families can search by suburb, postcode, service, or provider name without creating an account.

The entire platform was engineered in **Laravel 13 (PHP 8.3)** with **Blade**, **Tailwind CSS**, and **Alpine.js**. It encompasses three distinct portals: the public family directory, a dedicated healthcare provider dashboard, and an administrative control panel. Built with Google Maps Geocoding APIs, Stripe recurring billing, and Resend transactional email.

2. THE HEALTHCARE ACCESS CHALLENGE

Parents facing urgent pediatric care needs were bogged down by gated logins, fragmented directories, and lack of clarity around NDIS funding compatibility and telehealth availability.

3. THE ENGINEERING SOLUTION

Frictionless zero-login search with real-time Google Maps geocoding, multi-parameter filtering (funding, age group, telehealth), and automated Stripe subscription billing for verified medical practitioners.

4. Core Functional Modules

Map-First Provider Search
Synchronized interactive Google Maps and list views updating concurrently as parents filter locations.

Stripe Billing & Subscriptions
Automated recurring plans (Monthly/Annual), coupon codes, free trials, and webhook handling.

Direct Messaging & Inquiries
Secure parent-to-provider communication channel with real-time email notifications.

Provider Practice Console
Self-service management of clinic locations, team credentials, bio, and telehealth consultation links.

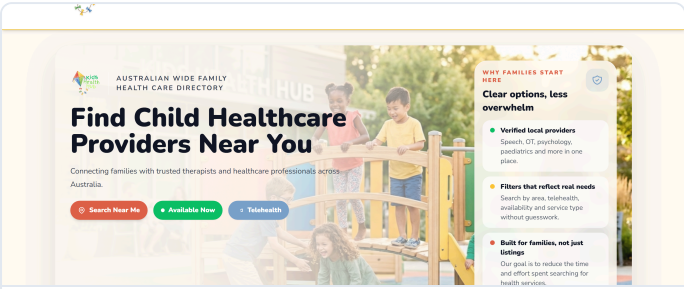

Administrative Verification Hub

Guides & FAQ System

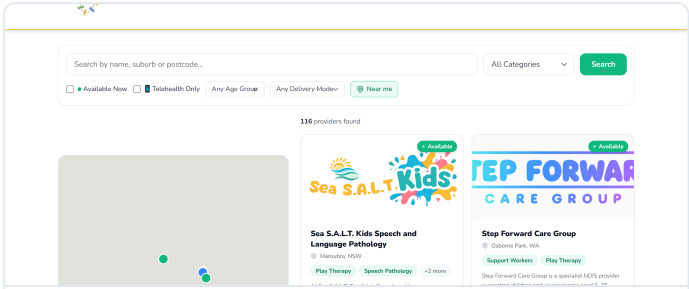

AHPRA credential verification, listing approval workflows, and revenue analytics.

Educational resource hub for parents exploring NDIS funding options and early intervention therapies.

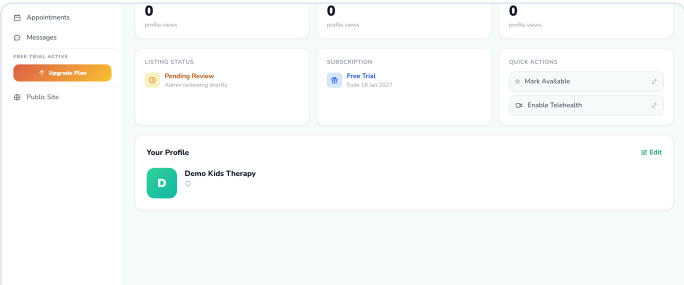

5. Application Interfaces

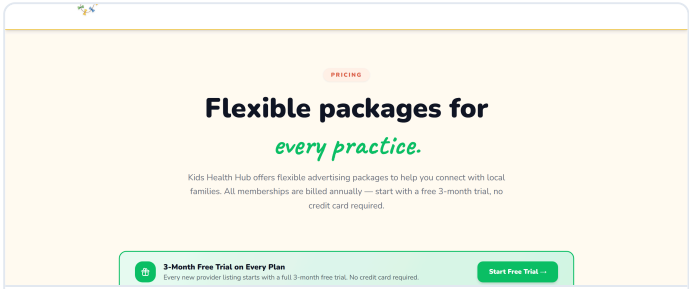

Interactive Map Search & Geolocation

Verified Provider Listing & Profiles

Provider Practice Management Dashboard

Stripe Subscription Plans & Checkout

6. Complete Technology Stack

Layer	Technology Implementation
Framework & Core	Laravel 13 (PHP 8.3), Blade Templates, Alpine.js
Styling & Design	Tailwind CSS, Responsive Grid, Phosphor/Lucide Icons
Mapping & Geolocation	Google Maps JavaScript API + Places & Geocoding APIs
Payments & Subscriptions	Stripe Checkout & Billing Webhooks with automated tier provisioning
Permissions & Security	Spatie Laravel Permission (Super Admin, Provider, Client roles)
Email Infrastructure	Resend Transactional Email API via Laravel Mail
Database	MySQL with Spatial Indexing for distance/radius queries
